May 31st, 2020 - molded specimen thicknesses ranged from 0 065 to 0 125

in 17 to 32 mm air inlet temperature and 20 to 29 °C dew point. When TPU elastomers are exposed to air just prior to processing the pellets are maintained at 150 to 200 °F (65 to 93 °C), a warmer temperature than the ambient air. A polymer temperature that is warmer than the ambient air reduces the ambient moisture absorption.
