---

controlling an activity schaffer 1984 the primary driving force behind the development of machine vision has been the manufacturing industry machine vision"photogrammetry

June 2nd, 2020 - photogrammetry uses methods from many disciplines including optics and projective geometry digital image capturing and photogrammetric processing includes several well defined stages which allow the generation of 2d or 3d digital models of the object as an end product the data model on the right shows what type of information can go into and e out of photogrammetric methods'

'close range photogrammetry meets machine vision zurich  
May 31st, 2020 - close rangephotogrammetry meetsmachinevision
