## **content based multimedia retrieval igi global**

May 18th, 2020 - content based multimedia retrieval 10 4018 978 1 60566 014 1 ch036 in the past decade there has been rapid growth in the use of digital media such as images video and

---

---

audio as the use of digital media increases'  
*'citeseerx improving access to multimedia using multi*

*April 6th, 2020 - citeseerx document details  
isaac councill lee giles pradeep teregowda  
abstract efficient retrieval of multi media content  
depends on the availability of adequate meta  
data to indicate the nature of the content such  
meta data often contains useful hierarchical  
categorisation but is frequently not consistent  
between different sources we outline a method to  
identify equivalent instances"*

**the potential of user feedback through the iterative**

**June 3rd, 2020 - we assume that iterative user feedback can improve the quality of queries to this end we developed a system for image retrieval that utilizes user feedback to refine the user s search query this is done by a graphical user interface that returns categories of images and requires the user to choose between them in order to improve the initial query in terms of accuracy and unambiguousness'**
