April 15th, 2018 - Population Genetics and Ecology Philip Hedrick OUTLINE 1

Introduction 2 Genetic drift and effective population Population genetics may be unique among biological' Conservation genetics of population bottlenecks the role

May 2nd, 2018 - Predicting the genetics consequences of small population size has been one of the major tasks of conservation biology The effects of population bottlenecks are directly related to the increase of stochastic events associated with small population size which lead in most cases to losses in genetic diversity Hedrick 2005'

'A STANDARDIZED GENETIC DIFFERENTIATION MEASURE

April 10th, 2018 - Abstract Interpretation of genetic differentiation values is often problematic because of their dependence on the level of genetic variation For example the maximum level of G_{ST} is less than the average within population homozygosity so that for highly variable loci even when no alleles are shared between subpopulations G_{ST} may be low'
