Normal diffusion and dynamical chaos Physics Stack Exchange

April 29th, 2020 - No chaos does not ensure normal diffusion The typical example for anomalous diffusion are systems whose behavior alternates between jumps bursts and relatively well behaved regimes A prototypical case is indeed intermittency see this introduction but also prominent are chaotic Hamiltonian systems which are not fully chaotic i e with mixed phase spaces ? here the chaotic behavior is'

'The influence of quantization on the onset of chaos in

April 17th, 2020 - The influence of quantization on the onset of chaos in Hamiltonian systems The Kolmogorov entropy interpretation Ronnie Kosloffa and Stuart A Rice The Department of Chemistry and The James Franck Institute The University of Chicago Chicago"Origins of Chaos in Nonlinear Oscillatory Hamiltonian

April 19th, 2020 - Origins of Chaos in Nonlinear Oscillatory Hamiltonian Systems A Thesis Presented to The Division of Mathematics and Natural Sciences Reed College In Partial Ful llment of the Requirements for the Degree Bachelor of Arts Mateo R Ochoa Coloma May 2016'

'The Kinematics of Mixing Stretching Chaos and Transport

April 30th, 2020 - In spite of its universality mixing is poorly understood and generally speaking mixing problems are attacked on a case by case basis This is the first book to present a unified treatment of the mixing of fluids from a kinematical viewpoint The author s aim is to provide a conceptually clear basis from which to launch analysis and to facilitate an understanding of the numerous mixing'

'Title Control of chaotic transport in Hamiltonian systems

April 4th, 2019 - Abstract It is shown that a relevant control of Hamiltonian chaos is possible through suitable small perturbations whose form can be explicitly puted In particular it is possible to control reduce the chaotic diffusion in the phase space of a Hamiltonian system with 1 5 degrees of freedom which models the diffusion of charged test particles in a turbulent electric field across the'

'Diffusion in Hamiltonian chaos and its size dependence

April 7th, 2020 - Diffusion in Hamiltonian chaos and its size dependence To cite this article T Konishi and K Kaneko 1990 J Phys A Math Gen 23 L715 View the article online for updates and enhancements Related content Clustered motion in symplectic coupled map systems T Konishi and K Kaneko Ionization mechanisms of one dimensional oscillators in high'

'Chaotic diffusion in nonlinear Hamiltonian systems

February 5th, 2020 - This work investigates di usion in nonlinear Hamiltonian systems The di usion more precisely subdi usion in such systems is induced by the intrinsic chaotic be havior of trajectories and thus is called chaotic di usion Its properties are studied on the example of one or two dimensional lattices of harmonic or nonlinear oscilla'

'Dynamical chaos systems of classical mechanics

April 28th, 2020 - generalization of such systems a modified two dimensional Lorentz gas that motion in purely deterministic systems can besimilar to Brownian motion 44 45 This result became the first rigorous confirmation of chaotic properties exhibited by dynamical systems not involving any random mechanism Further investigations of nonlinear systems both theore'

'Chaotic and Arnold stripes in weakly chaotic Hamiltonian

April 15th, 2020 - Chaotic and Arnold stripes in weakly chaotic Hamiltonian systems M S Custo ´dio 1 C Manchein 2 and M W Beims1 1Departamento de F? ´sica Universidade Federal do Parana ´ 81531?990 Curitiba Brazil 2Departamento de F? ´sica Universidade do Estado de Santa Catarina 89219?710 Joinville Brazil'

'Higher order Melnikov method and chaos for two degree of

March 12th, 2020 - We consider two degree of freedom Hamiltonian systems with saddle centers and develop a Melnikov type technique for detecting creation of transverse homoclinic orbits by higher order terms We apply the technique to the generalized H ´enon Heiles system and give a positive answer to a remaining question of whether chaotic dynamics occurs for some parameter values although it is known to be'

'Download PDF Hamiltonian Systems And Celestial Mechanics

March 6th, 2020 - The aim of the IV International Symposium on Hamiltonian Systems and Celestial Mechanics HAMSYS 2001 was to join top researchers in the area of Celestial Mechanics Hamiltonian systems and related topics in order to municate new results and look forward for join research projects'Physics of Chaos in Hamiltonian Systems

April 22nd, 2020 - This book aims to familiarise the reader with the essential properties of the chaotic dynamics of Hamiltonian systems It includes unique material on separatrix chaos small nonlinearity chaos fractional kinetics and discussions on Maxwell s Demon and the foundation of statistical physics Special'

'IEEE TRANSACTIONS ON CIRCUITS AND SYSTEMS VOL CAS 30 NO

March 26th, 2020 - many systems in several disciplines A technique due to Melnikov provides an analytical tool for measuring chaos caused by horseshoes in certain systems The phenomenon of Arnold diffusion is another type of plicated behavior Since 1964 it has been playing an important role for Hamiltonian systems in physics'

'Control of chaotic transport in Hamiltonian systems

April 18th, 2020 - It is shown that a relevant control of Hamiltonian chaos is possible through suitable small perturbations whose form can be explicitly puted In particular it is possible to control reduce the chaotic diffusion in the phase space of a Hamiltonian system with 1 5 degrees of freedom which models the diffusion of'

'Strong and Weak Chaos in Weakly Nonintegrable Many Body

March 26th, 2020 - Keywords Lyapunov exponent · Arnold diffusion · Chaos spreading 1 Introduction Even 120 years after the fundamental work of Poincar ´e 1 and numerous efforts done after it an interplay between order and chaos in high dimensional Hamiltonian systems remains a challenging problem For Hamiltonian dynamics with a few degrees of freedom a clear'

'Hamiltonian chaos Galileo Unbound

February 20th, 2020 - Hamiltonian chaos is usually displayed as multi color Poincar ´e sections also known as first return maps that are created when a set of single trajectories each represented by a single color pierce the Poincar ´e plane over and over again The archetype of all Hamiltonian systems is the harmonic oscillator"Diffusion in Hamiltonian systems Chaos An

February 3rd, 2020 - The study is reported of a diffusion in a model of degenerate Hamiltonian systems The Hamiltonian under consideration is the sum of a linear function of action variables and a periodic function of angle variables Under certain choices of these functions the diffusion of action variables exists In the case of two degrees of freedom during the process of diffusion the vector of the action"Stochastic chaos induced by diffusion processes with

April 5th, 2020 - The threshold amplitude of diffusion processes for the onset of chaos is derived by using the stochastic Melnikov method together with a mean square criterion Two quasi Hamiltonian systems namely a damped single pendulum and damped Duffing oscillator perturbed by stochastic excitations are used as illustrative examples'

'Diffusion models in strongly chaotic Hamiltonian systems

March 28th, 2020 - The main subject of this thesis is the long time behaviour of strongly chaotic Hamiltonian systems and whether their behaviour ran be modelled with diffusion processes The problem of diffusion caused by chaos in a particular area preserving map on the torus the web map is studied The formalism is then generalised for the study of diffusion in higher dimensional symplectic maps on the'

'Hamiltonian Systems an overview ScienceDirect Topics

February 20th, 2020 - The locally Hamiltonian KAM Theory was constructed by I O Parasyuk and Yu V Love?kin see their papers concerning coisotropic 291 292 342?344 and atropic 293 tori in locally Hamiltonian systems This theory has been briefly

reviewed in 412 By the way Lemma 20 is valid for invariant tori of locally Hamiltonian systems as well'

'Examining the Chaotic Behavior in Dynamical Systems by

April 23rd, 2020 - We perform the stability analysis and we study the chaotic behavior of dynamical systems which depict the 3 particle Toda lattice truncations through the lens of the 0 1 test proposed by Gottwald and Melbourne We prove that the new test applies successfully and with good accuracy in most of the cases we investigated We perform some parisons of the well known maximum Lyapunov"

April 27th, 2020 - Ott Chaos in dynamical systems 1993 Edward Ott Cambridge University Press Additional reading GH Nonlinear Oscillations Dynamical Systems and Bifurcations of Vector Fields Guckenheimer J and P Holmes Springer

Verlag 1983 W Introduction to Applied Nonlinear Dynamical Systems and Chaos Stephen Wiggins 1990"Chaos and diffusion in hamiltonian systems proceedings

April 11th, 2020 - Diffusion phenomena and probabilistic methods J P Provost Resonant structure and diffusion in hamiltonian systems A Morbidelli Dynamical chaos and deterministic diffusion V Zeitlin Methods of plex analysis in classical perturbation theory A Giilli New formulation of stochastic mechanics applications to chaos L'

'LETTER TO THE EDITOR Diffusion in Hamiltonian chaos and

April 20th, 2020 - The diffusion coefficient of a model with global interaction is also studied It again is enhanced with the system size Studies on Hamiltonian chaos have a great importance in fundamental physics as a basis of classical statistical mechanics as well as in application to plasma confinement solid state physics etc l 71'

'PDF Weak Chaos and Diffusion in Hamiltonian Systems

March 27th, 2020 - We use cookies to make interactions with our website easy and meaningful to better understand the use of our services and to tailor advertising'

'On the chaotic diffusion in multidimensional Hamiltonian

July 18th, 2019 - We present numerical evidence that diffusion in the herein studied multidimensional near integrable Hamiltonian systems departs from a normal process at least for realistic timescales Therefore the derivation of a diffusion coefficient from a linear fit on the variance evolution of the unperturbed integrals fails'

'ORDER AND CHAOS IN MULTIDIMENSIONAL HAMILTONIAN SYSTEMS

April 16th, 2020 - Contents 1 N?Degree? of?Freedom Hamiltonian Lattices 2 GALIk t Chaos and Order via Tangent Dynamics 3 Analytical Estimates for the GALIk t Indices 4 Applications of GALIk for Detecting Chaos and Order 5

Dimensionality of Tori and Diffusion in FPU Lattices 6 On the Dynamics Near Stable Discrete Breathers'

'Hamiltonian Chaos Chaos and Time Series Analysis

March 13th, 2020 - Hamiltonian Chaos Chaos and Time Series Analysis 10 24 00 Lecture 8 in Physics 505 Warning This is probably the most technically difficult lecture of the course ments on Homework 6 Lyapunov Exponent Not everyone had a good graph of LE versus C for B 0 3 Some had numerical troubles with unbounded orbits C gt 1 42 BASIC code for doing part 3 has been put on the'

'Stochastic chaos induced by diffusion processes with

November 5th, 2019 - Stochastic chaos induced by diffusion processes with identical spectral density but different probability density functions PDFs is investigated in selected lightly damped Hamiltonian systems The threshold amplitude of diffusion processes for the onset of chaos is derived by using the stochastic Melnikov method together with a mean square'

'CiteSeerX Chaos and Arnold Diffusion in Dynamical Systems

March 4th, 2020 - The phenomenon of Amold diffusion is another type of plicated behavior Since 1964 it has been playing an important role for Hamiltonian systems in physics We present a tutorial treatment of this work and its place in dynamical systems theory with an emphasis on results that can be checked in specific systems"PDF Control Of Chaos In Hamiltonian Systems

April 16th, 2020 - Through the perturbation of the Hamiltonian from an integrable system we obtain a chaotic system In Ciraolo et al 2003 a method of the chaos control by adding to the Hamiltonian a control"

April 21st, 2020 - DIFFUSION IN SMOOTH HAMILTONIAN SYSTEMS 155 resonance separatrices Especially important and unex pected was that the system nevertheless remained non integrable but the separatrix not only was conserved

under strong chaos conditions but also prevented global diffusion A similar theorem for the same model was later"Chaos in Hamiltonian Systems JSTOR

April 30th, 2020 - Chaos in hamiltonian systems 135 behaviour through the recent developments in renormalization theory as dis cussed by Rand this symposium These three situations are used as bases from which to explore the mixed systems K A M AND PERTURBATION EXPANSIONS These are used to explore the neighbourhood of the integrable systems"

Chaos theory

April 30th, 2020 - Chaos theory is a branch of mathematics focusing on the study of chaos?states of dynamical systems whose apparently random states of disorder and irregularities are often governed by deterministic laws that are highly sensitive to initial conditions Chaos theory is an interdisciplinary theory stating that within the apparent randomness of chaotic plex systems there are underlying"

"Chaos random walks and diffusion in Hamiltonian systems

April 17th, 2020 - Chaos random walks and diffusion in Hamiltonian systems'

'Relativistic quantum chaos An emergent interdisciplinary field

April 17th, 2020 - quantum chaos depending on whether the system under study is closed or open different issues have been pursued For example in closed chaotic Hamiltonian systems the basic phenomena that have been and continue to be studied include energy level spacing statistics3?19 and quantum scar ring 20?52 In open Hamiltonian systems quantum chaotic'

'Chaos and Arnold diffusion in dynamical systems CORE

October 1st, 2018 - The phenomenon of Arnold diffusion is another type of plicated behavior Since 1964 it has been playing an important role for Hamiltonian systems in physics We present a tutorial treatment of this work and its place in dynamical systems theory with an emphasis on results that can be checked in specific systems'

'chaos theory Diffusion in the standard map Physics

April 29th, 2020 - The following is a passage from Diffusion in the standard map pdf by Itzhack Dana and Shmuel Fishman A major difficulty in the analysis of chaotic behavior of Hamiltonian systems is the proximity of chaotic and regular orbits on various scales 2"

Weak Chaos and Diffusion in Hamiltonian Systems From

November 18th, 2019 - Not Available adshelp at cfa harvard edu The ADS is operated by the Smithsonian Astrophysical Observatory under NASA Cooperative Agreement NNX16AC86A"Chaotic Dynamics in Hamiltonian Systems World Scientific

April 15th, 2020 - The book begins with a thorough introduction to dynamical systems and their applications It goes on to develop the theory of regular and stochastic behavior in higher degree of freedom Hamiltonian systems covering topics such as

homoclinic chaos KAM theory the Melnikov method and Arnold diffusion"Control of chaos in Hamiltonian systems arxiv vanity

April 30th, 2020 - We present a technique to control chaos in Hamiltonian systems which are close to integrable By adding a small and simple control term to the perturbation the system bees more regular than the original one We apply this technique to a forced pendulum model and show numerically that the control is able to drastically reduced chaos'

'Diffusion for Coupled Map Lattices

April 10th, 2020 - Hamiltonian systems Diffusion for Coupled Map Lattices Antti Kupiainen joint work with J Bricmont Oslo 8 6 2009 Coupled dynamics Coupled chaos Local energy Diffusion CML Coupling Diffusion for maps Fast dynamics Random environment Slow dynamics Slow dynamics annealed Slow dynamics quenched Linear problem"

"Toward a theory of relaxation in correlated systems

March 17th, 2020 - Journal of Non Crystalline Solids 131 133 1991 233 237 233 North Holland Toward a theory of relaxation in correlated systems diffusion in the phase space of a chaotic Hamiltonian K L Ngai and R W Rendell Naval Research Laboratory Washington DC 20375 5000 USA Relaxation in correlated systems such as interacting ions entangled polymer chains or viscous liquids requires a time dependent"

Diffusion in Hamiltonian systems Chaos An April 20th, 2020 - The study is reported of a diffusion in a model of degenerate Hamiltonian systems The Hamiltonian under consideration is the sum of a linear function of action variables and a periodic function of angle variables Under certain choices of these functions the diffusion of action variables exists"Contributions of plasma physics to chaos and nonlinear

April 7th, 2020 - This review focusses on the contributions of plasma physics to chaos and nonlinear dynamics bringing new methods which are or can be used in other scientific domains It starts with the development of the theory of Hamiltonian chaos and then deals with order or quasi order for instance adiabatic and soliton theories'

'Chaos and diffusion in Hamiltonian systems NASA ADS

December 8th, 2019 - Not Available adshelp at cfa harvard edu The ADS is operated by the Smithsonian Astrophysical Observatory under NASA Cooperative Agreement NNX16AC86A'

'Weak Chaos and Diffusion in Hamiltonian Systems SpringerLink

March 5th, 2020 - Weak Chaos and Diffusion in Hamiltonian Systems obtained applied to the distribution of asteroids can help in solving some puzzling problems such that of ?stable? chaos or that of the Kirkwood gaps Frequency analysis for multi dimensional systems Global dynamics and diffusion Physica D 67 257?281 1993'

'Gee Zaslavsky

April 20th, 2020 - Unlike the famous Arnold diffusion in non degenerated Hamiltonian systems that appears only if the number of degrees of freedom exceeds 2 diffusion in the Zaslavsky webs is possible at one and half degrees of freedom This diffusion is rather universal phenomenon and its speed is much greater than that of Arnold diffusion'

'On the chaotic diffusion in multidimensional Hamiltonian

March 15th, 2020 - We present numerical evidence that diffusion in the herein studied multidimensional near integrable Hamiltonian systems departs from a normal process at least for realistic timescales Therefore the derivation of a diffusion

coefficient from a linear fit on the variance evolution of the unperturbed integrals fails We review some topics on diffusion in the Arnold Hamiltonian and yield'
