## **escrs guidelines for**

May 27th, 2020 -  
needed to conduct  
clinical trials  
prevention and  
elimination of  
postoperative  
endophthalmitis  
however is a  
constant goal of  
every ophthalmic  
surgeon the  
clinical practice  
of administering  
a direct  
intracameral  
injection of  
cefuroxime at the  
close of cataract  
surgery to reduce  
endophthalmitis  
rates was first  
implemented'

## **'endophthalmitis after intravitreal injections incidence**

May 21st, 2020 -  
many studies have  
identified  
modifiable risk  
factors to  
prevent  
endophthalmitis  
following ivt  
injections and  
guidelines based  
on current best  
evidence and  
practices have

---

---

been published in  
different  
countries 8 9  
however while  
some remendations  
have been applied  
in current  
clinical practice  
such as a  
dedicated setting  
for ivt  
injections debate  
continues on the  
intraoperative  
and' '**current  
approach to  
postoperative  
endophthalmitis**  
May 22nd, 2020 -  
**endophthalmitis**  
**is a rare  
plication  
potentially the  
most devastating  
of intraocular  
surgery or trauma  
despite major  
advances in  
asepsis surgical  
technique and  
antibiotic  
therapy it  
remains a major  
concern for any  
ocular surgeon  
its prevention by  
meticulous  
clinical  
evaluation of  
preoperative risk  
factors accurate  
surgical**

knowledge for  
medical students  
and**

May 17th, 2020 -

**endophthalmitis  
may present**

**either acutely  
with sudden deep  
ocular pain and  
rapidly  
progressive loss  
of vision or  
indolently  
chronic**

**endophthalmitis  
clinical features  
include**

**conjunctival  
hyperemia corneal  
haziness hypopyon**

---

---

and decreased  
visual acuity  
vitreous  
infiltrates are  
seen on slit lamp  
examination'

'springer  
endophthalmitis  
in clinical  
practice 2018 en  
April 22nd, 2020  
- it includes  
many tips tricks  
clinical pearls  
and colour  
photographs to  
illustrate  
various aspects  
of diagnosis that  
can be quickly  
referred to when  
assessing  
patients  
endophthalmitis  
in clinical  
practice utilises  
an easy to follow  
cookbook style to  
ensure that  
information can  
be rapidly and  
efficiently  
obtained for the  
best possible  
care of patients  
with  
endophthalmitis'
